 - Dynamic filtering & audio player for enhanced user experience.
 - Responsive design using React, Next.js, Tailwind & Material UI.
 - Custom APIs for embedding novels feature deploy on AWS and CI/CD integrated.
- **Team size:** 2 people.
- **Technologies Used:** React, Next.js, Firebase (for auth), ExpressJs, MongoDB, HowlerJs (for audio), Material UI, Tailwind CSS
- **Status:** Deployment - periodically maintaining.

[Nest-Dev Camper](#) — Backend Api server for Bootcamps, Courses, Reviews CRUD and implement JWT token for authentication
(10/2023-11/2023)

- **Position:** Backend Developer.
- **Target:** Developed a scalable NestJS backend API, ensuring CRUD operations for bootcamps, courses within bootcamps, reviews, and comprehensive admin and teacher controls.
- **Responsibilities:**
 - MongoDB schema & models for bootcamps, courses & reviews.
 - RESTful API (CRUD) for managing entities (JWT auth).
 - Admin & teacher controls with robust validation & error handling.
- **Technologies Used:** MongoDB, JWT authentication, RESTful APIs, NestJS, TypeScript, NestJS middleware.

SKILLS

- Javascript, Typescript
- ReactJs, NextJs
- Nodejs, ExpressJs, NestJs
- HTML5/ CSS3
- MongoDB, Firebase
- AWS, CI/CD
- Github

EDUCATION

Foreign Trade University

Field: Business Administration
Sep 2016 - Sep 2019 (Suspended)

SELF-LEARNING

Udemy

Frontend / backend development courses from 2020.

- **Node.js API Masterclass With Express & MongoDB**
- **Complete SQL Bootcamp**
- **Complete Web Development**
- **Complete React Developer**
- **Flutter Dart - The Complete Guide**
- **Data Structures + Algorithms**
- **Advanced Javascript Concepts**

LANGUAGES

- English - Basic level

- **Status:** Deployment.

HOBBIES

MyEducation — An React app for learning, creating and managing courses (06/2023-07/2023)

- **Position:** Frontend Developer.
- **Target:** Build an education app that enables users to view and find relevant courses for online learning. Users can create courses or learn and engage in self-improvement online, without limitations of time or space..
- **Responsibilities:**
 - Develop a single-page app (SPA) for online learning.
 - Three user roles: admin, lecturer, student.
 - User auth, Docker for server setup.
 - Build core functionalities:
 - Login/register (student)
 - Pages: homepage, categories, search, product
 - Filtering component for real-time search refinement
 - Search bar with dynamic results
- **Technologies Used:** React, Redux, Saga, Ant Design, Material UI, Tailwind CSS, React-oauth/google, Nestjs, MySQL, Docker.
- **Github:** <https://github.com/Team-Dev-2023/my-education-app>

- Coffee

Expensify — A React expense Management Web Application (05/2023-06/2023)

- **Position:** Fullstack Developer.
- **Target:** Develop an expense management web app to help users efficiently manage their expenses
- **Responsibilities:**
 - CRUD operations for expenses (add, edit, remove).
